

# BARIATRIC PRODUCTS

Products designed and developed with the larger sized person in mind, bariatric products provide comfort, durability, style and dimension to assist people who need them in their daily lives. This section offers a range of wider products, constructed from stronger materials, with higher weight capacities. We have included a diverse range of Wheelchairs, Rollators, Walking Sticks, Crutches and Bathroom Products.

## THINGS TO CONSIDER

- User's physical requirements (height, weight, etc.). Some users may not be suited to certain products based on their physical limitations.
- Weight Capacity required.
- Size of product required (seat widths).
- Activity of person/s using the product. Will the product be exposed to a high rate of activity? This could cause strain on the product that affects the lifespan of the product.

## IN THIS SECTION

WHEELCHAIRS.....	PAGE 154
ROLLATORS.....	PAGE 155
QUAD CANES.....	PAGE 156
