

Freedom Healthcare has carefully designed a range of beds that is suitable for the domestic market, and a specially designed bed for nursing homes and agecare institutions, they offer a contemporary feel and will fit in with most of today's decor.

We believe the patient should have all the comfort, support and as many functions and features as possible.

Our range of beds is reliable, durable and low maintenance.

## THINGS TO CONSIDER

- User's physical requirements (height, weight, etc.). Some users may not be suited to some beds based on their physical limitations.
- Consider the level of care the user needs. Does the user require any special functions or options.  
e.g. Lifting pole, I.V pole, Side rails, Special castors.
- Does the patient suffer from incontinence?  
Do they require an incontinence proof cover for the mattress?
- Consider patient transferring options.  
e.g. Transfer board, patient assist grab handle.  
Does the user require half length bed rails so that they can lift themselves out of bed?
- What type of environment will the product be used in?  
Is the product for rental purposes, domestic or aged care institution use?
- Transportation requirements, is it for domestic use or is it to be transported regularly for rental purposes?
- Accessories and Warranty

### MEASUREMENT CONVERTER

1 inch = 2.54 centimeters

1 Kg = 2.2 pounds

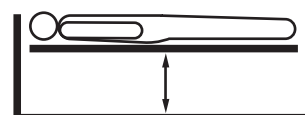

## Illustration for the functions

Backrest Adjustment

Knee brake Adjustment

Height Adjustment
