

BATHROOM AIDS

Offering safety, comfort and durability, our range of bathroom aids features products which can help reduce the risk of falls and help maintain independence in a wet environment.

The new oval tubing on some products increases strength without adding to the overall weight.

Our products ranges from Stainless Steel Mobile Commodes to Over Toilet Chairs and Light Weight Bath Transfer Benches with sliding seats. All the Freedom Healthcare products are tested for strength and stability and our proven designs are suitable for domestic or institutional use.

THINGS TO CONSIDER

- User's physical requirements (height, weight, etc.). Some users may not be suited to certain products based on their physical limitations.
- Determine the correct seat height for user according to recommendations from medical or healthcare professionals.
- Consider transferring limitations, onto or off the product.
- Is the product for hire, domestic or institutional use? This may influence the type of material needed (i.e.. steel, stainless steel or aluminium)
- Storage or transportation requirements, can it be folded away and stored easily?

MEASUREMENT CONVERTER

1 inch = 2.54 centimeters

1 Kg = 2.2 pounds
