

For the ultimate seating. Freedom offers a range of chairs that feature comfort, style, design, functionality and reliability. With the new contemporary styling, Freedom chairs will fit in with most modern decor.

Freedom's range of specialist chairs includes pressure relieving chairs such as the Air Comfy chair/Tilt bed and the Delux Air Chair with folding side supports, these products have been trialled and tested to offer better results than most other chairs offered on the market.

Pressure mapping tests have been performed to most of our seating range (see pressure mapping diagram).

All of our motorised chairs are fitted with high quality German sourced motors and mechanisms.

THINGS TO CONSIDER

- User's physical requirements (support, support position, height, weight, etc.). Some users may not be suited to certain products based on their physical limitations.
 - Determine the correct seat height for the user (for height adjustable chairs) according to recommendations from medical or healthcare professionals.
 - Does the patient suffer from incontinence?
 - Do they require an incontinence proof cover?
- Please make sure to choose a chair with the correct upholstery cover requirements.
- Consider patient transferring limitations. e.g transfer of patient onto and off the chair.
 - Is the product for hire, domestic or institutional use? This may influence the type of upholstery cover requirements (e.g. fabric, vinyl or water resistant cover).
 - Accessories and Warranty.

MEASUREMENT CONVERTER

1 inch = 2.54 centimeters

1 Kg = 2.2 pounds
